

# DEERY<sup>®</sup> BRAND

## Hot Applied Pavement Repair Mastic

Leveling utility cuts

Repair longitudinal & shoulder joints

Repair prior to surface treatment

Patch pavement deterioration & pothole repair

**When the pavement damage has progressed beyond the limits of crack sealing and crack filling, DEERY Level & Go is the solution to extend the usable life of pavement.**

**DEERY Level & Go Repair Mastic**  
Part No. 80320

**DESCRIPTION:** Deery Level & Go Repair Mastic is a black, flexible, hot-applied, pre-packaged, and ready to melt overband mastic repair material for concrete and asphalt pavements. Deery Level & Go Repair Mastic is composed of quality-selected asphalt, clean, hard, durable particles of wear resistant aggregates, synthetic rubber polymers, anti-oxidants, naturally occurring and man-made reinforcing materials. Available in black asphalt color. The weight per cubic foot of the installed Level & Go Repair Mastic Material shall be 107 pounds per cubic foot (+/- 3%). VOC=0 g/l.

**USE:** Deery Level & Go is designed to repair pavement distresses that are in a confined or recessed area or that are unconfined and require a feathered edge. Examples of appropriate uses include but are not limited to wide (> 1.5" (38 mm)) pavement cracks and longitudinal cracks, pavement joint separations, bridge deck approaches, spalled concrete joints, utility cuts, potholes, leveling repairs, repairs prior to a surface treatment and many more types of pavement distresses.

### Features:

- Creates a highly adhesive, flexible and durable repair that supports heavy loads in all climates
- Highly bonds to AC and PCC pavement
- Long-term solution (5 years or more performance)
- Engineered design in premeasured package with no field blending
- Easy installation
- Ability to open traffic in ~30 minutes
- 2-person crew can apply using a Patcher with no compaction required

### Benefits:

- Created long-lasting durable repair saving you time and money
- Use in a large variety of pavement distresses saving you time and money
- Long lasting repair reduces costs associated with maintaining the same repair and allows you to focus on other repairs
- Prepackaged and mixed assures you that the product will work as intended and reduces errors associated with application
- Easy installation reduces errors and enhances worker satisfaction
- Allows the traffic flow to continue with minimal interruption
- Reduces overall costs of application and improves productivity to repair more distresses
